Preprocessing Stain Remover For Spray

EXPERT

Grease-cutting power for tough dirt and persistent stain.
Easy to use for everyone.

Just spray. Easy task from aqueous stain to oil-based stain.

EXPERT is effective to remove tough stain, sweat stain of winter coat, outer clothes, summer blouse and others for everyone.

Just Expert, great effect both petroleum solvent and water medium.

EXPERT has high detergency than ever in any machine of Perchloroethylene, petroleum solvent, water medium, and preprocessing of wet cleaning.

Easy to use for part time staff.

EXPERT has no risk to get moldy, discoloration, damaging of fiber even if a part time staff uses it at preprocessing without advanced knowledge of cleaning.

Features

Preprocessing stain remover EXPERT which derives from an expert and a specialist is developed by engineers of Arimagi after years of study. It was also made in combination with dry soap DRY EX and SILICONE SOAP. Some conventional preprocessing agent had a risk of bleeding and contraction by spray in water which being diluted with enzyme and aqueous surfactant. Expert of AMG was produced by stably associated oil-based surfactant and petroleum solvent to resolve these problems. As compared the conventional products, it made further effect of osmotic strength and solvency power to water-soluble and oil-based stain. Have freedom from worry about contraction and back contamination by multiplier effect of petroleum solvent.

Usage

Wash right after spray undiluted EXPERT on a stain and dust.

Spray undiluted EXPERT on a stain and give clothe right brushing if you want.

Use gun spray or plastic spatula to transfuse Expert with cloth or another product DRY-STAIN and STAIN REMOVING EXPERT(SHIMINUKI NO TATSUJIN) for tough stain.

Precaution for use

Please test EXPERT on cloth backing in specific cloth with color fastness like an import print, oil cloth and laminating. There is a possibility to begin to melt the dye by washing with stain and dirt.

Sometimes stain remains on the cloth when you wash it softly after using EXPERT like pretreatment agent in a household washing machine. In that case, repeat wash and rinse well.

Please wear gloves and glasses as protectors and ventilate well in working state.

Character and Package

Neutral. Non-ion surface active agent base. (liquid)

16 L/NET in an oil tin.

4 L/NET in a plastic container.
